Superb Materials

Care has been taken to construct our gardening products from a variety of excellent materials. When crafting our steel and stainless steel products, we select the best material from highly reputable sources. All of the steel used in the construction has been either hardened, tempered, or heat-treated to ensure the durability and longevity of the product. We make thoughtful decisions when matching product material to product purpose. This principle can be seen across our entire product line, from our lightweight polypropylene rakes to our heavy duty PVC hoses.

Designed & Constructed With You in Mind

Wherever possible, we've incorporated user-friendly conveniences into our products. Notice, for instance, the handles of our trowels and cultivators, which feature holes for convenient peggable storage. Many of our loppers, pruners, and shears feature non-stick blades to ease the frustration of cutting and trimming. These are just two of the built-in conveniences that bring ease and comfort to our green-thumbed gardeners.

Rigorous Testing

All of our garden tools have been submitted to rigorous quality assurance tests. The materials used to make each product are screened several times before the production process begins. During and after production, tools are tested both visually and manually. Our testing procedures have been developed to ensure the quality and integrity of every product that reaches our customers.

Customer Service

Bond pledges to reinforce the quality of our product with excellent customer service. We are at your disposal during our listed hours to respond to any question or issue that may arise as you use our products to beautify your lawn or garden. Visit us at www.bondmfg.com and use our advanced website system to further address any questions you may have regarding our products and services. Call us at 866.771.BOND (2663)

Watering

We carry an extensive selection of hoses, each one specially designed for a particular outdoor purpose. For lawn and garden watering, we offer light duty hoses, as well as sprinkler and soaker models. If you expect your hose to endure more wear and tear, we offer stronger models ranging from medium duty to contractor grade. Our models come in a variety of lengths. Though the composition of couplings will vary depending on the model (materials include: solid brass, stainless steel, and nickel-plated brass); all couplings are long-lasting and remarkably crushproof. We are also proud to offer specialty models for decks, boats, and campers.

Maximize the power of your hose with one of our specially designed watering attachments. For broad and efficient watering, we offer a range of oscillating, stationary, and pulsating sprinklers. For targeted watering and cleaning, choose from our high-quality nozzles, pistols, and water wands.

Hand Tools for Planting & Cultivating

Raising healthy and beautiful plants begins with the correct tools. We offer a selection of trowels, cultivators, transplanters, and other gardening implements; all carefully crafted for comfort and performance. To suit your particular needs and preferences, many of our tools come in a variety of materials, including: durable steel, long-wearing stainless steel, and lightweight fiberglass.

Shovels and Rakes

Design specificity is the hallmark of our shovel and rake selection. Our shovel catalog includes: square heads for transporting soil, round heads for easy digging, and ergonomic D-handled models for extra comfort. Our digging products also come in a range of materials, from contractor grade steel to versatile fiberglass. Likewise, our selection of rakes is all about quality and variety. Collect fallen leaves comfortably with one of our lightweight polypropylene fan rakes, or use a powerful bow rake to break up cultivated soil. Our catalog also includes durable spring-back and lightweight bamboo models, all thoughtfully designed to help you beautify your lawn and garden.

Pruners, Loppers, and Shears

To help you control lawn and garden overgrowth, we offer an assortment of highly specialized cutting tools. Our grass and floral shears make easy work of your delicate trimming jobs, while our precision pruners, sturdy loppers, and robust hedge shears reduce the hassle of cutting through wood stems.

Plant Support

Sometimes a garden requires more support than what the gentle hands of the gardener can provide. For these cases, we offer innovative products to control growth and provide stability. Our selection of supportive implements include: saucers, stakes, twine, ties, and wire.

Displays

We offer a large selection of quality retail display fixtures. Our inventory consists of a huge range of products suitable for both large and small retailers. We have a display that will meet your needs. If we do not have what you are looking for, we can create a customized display based on your specific requirements.
